

# Matthew Enyina

Full stack engineer with 3+ years of experience developing web services. My most vital skills are Node.js and React.js. I'm very flexible in working with different technologies and methodologies, so I can quickly learn and adapt to new environments.

## EXPERIENCE

### Euidem I.T Solutions, Lagos, Nigeria — *Full Stack Engineer*

August 2021 - PRESENT

Euidem I.T Solutions is a company that offers design and build services from initial idea to final execution. Worked with the backend team, focused on building APIs for a product suggestion service.

- Partnered with product managers, stakeholders, and designers to build new product offerings and tooling across the platform.
- Refactored 40% of legacy code to make the codebase cleaner and improved performance using newer React functionalities.
- Improved customer experience by implementing scheduling service appointments (pick up and drop offs)
- Improved analytics by tracking suggestion history
- Write efficient unit and integration tests.
- Review code Properly document API.

### HOWMIES, Nigeria — *Backend Engineer*

June 2020 - July 2021

HOWMIES is a start-up to provide affordable and easy-to-access housing services.

- Worked with five engineers in building a property listing system (similar to Airbnb).
- Developed Web API backend using Node.js, Express.js, and JWT for user authentication.
- Used Netlify for hosting.
- Integrated with Nodemailer for email and SMS notifications.
- Write efficient unit and integration tests.
- Review code.
- Document API.
