## EXPERIENCE

### Famasi Africa, Nigeria — Full stack Product Engineer (June 2024 - Present)

[Famasi Africa](#)

- Utilized Prisma with MongoDB to implement complex geospatial queries, reducing data retrieval time and improving app responsiveness.
- Developed advanced real-time features in React Native with Socket.IO for dynamic, live updates, enabling seamless communication and instant data reflection in UI components
- Diagnosed and resolved complex issues across the stack, using tools like Expo and React DevTools, to optimize for performance and user-centric design.
- Spearheaded backend codebase refactoring to boost maintainability and scalability
- Lead and mentored a team of 3 developers through initial projects, prepared onboarding tasks, and conducted technical evaluations to assess fit, focusing on skill alignment, communication, and cultural integration

### DabaObject LLC, Nigeria — Frontend Engineer (January 2024 – May 2024)

- Spearheaded the design and development of a streamlined mobile app interface for a restaurant, enabling customers to order seamlessly from their tables, resulting in a 15% increase in average order value and enhancing customer engagement
- Established a robust automated testing and deployment pipeline, ensuring code quality and continuous integration through GitHub Actions, which accelerated release cycles and reduced manual QA efforts.
- Conducted comprehensive code reviews, enforcing best practices and optimizing code structure for maintainability and scalability, significantly improving development efficiency and reducing technical debt.

### YEBOX, Nigeria — Backend Engineer (August 2023 – January 2024)

[Yebox.io](#)

- Optimized complex codebase (legacy & modern) & reduced dev time by 20% with reusable templates.
- Spearheaded 1-month refactoring: 40% code maintainability & 50% performance boost.
- Delivered projects on time through meticulous planning & execution.
- Established robust testing framework (Jest).
- code quality: active reviews, improved structure & documented APIs.

### Howmies, Nigeria — Full stack Engineer (January 2020–August 2023)

- Partnered with stakeholders to develop a property listing system (similar to Airbnb)

## TECHNICAL SKILLS

JavaScript  
TypeScript  
Node.js  
Nest.js  
React.js  
Next.js  
React Native

## DATABASES

MongoDB  
PostgreSQL  
MySQL

## SKILLS

High emotional intelligence  
Excellent communication  
Collaboration  
Agile Processes

## TOOLS

Git/GitHub/Gitlab  
GitHub Actions/ Gitlab CI  
Kubernetes  
Postman  
Docker

## TESTS

Jest

## CLOUD SERVICES

AWS  
Heroku  
Digital Ocean  
Render

## LANGUAGES

English - Fluent.

- Developed a user-friendly Interface that focused on simplicity and functionality
- Integrated with Nodemailer for email notifications.
- Build a robust rest API with Node.js.

## PROJECTS

**Yebora** — Built a secure backend for a funds pooling app, enabling group savings & real-time balance tracking. My backend development expertise ensured 100% secure transactions, real-time balance tracking, and seamless user experiences.

**Xtride** — Architected the backend of a user-friendly delivery app, ensuring smooth order placement, real-time tracking, efficient delivery management, and integrating with payment gateways.

**Sportstatix** — Contributed to a next-generation sports analytics platform that is transforming the way teams and athletes approach training and competition.

**Restro** — This user-friendly food ordering app caters to restaurants, shops selling prepared foods, and hotels offering in-room dining. Businesses can easily populate their menus within the app, eliminating the need for coding. (Frontend)
