Matthew Enyina

Full-Stack JavaScript Engineer with 6+ years of experience building scalable, real-time applications across health tech, fintech, logistics, and SaaS. Expert in React, TypeScript, Node.js, and backend architecture with a strong focus on developer velocity, system performance, and user experience. Proven leadership in shipping production-ready software, mentoring dev teams, and optimizing workflows in agile remote environments.

EXPERIENCE

Famasi Africa, Nigeria —*Full stack Product Engineer*
Famasi Africa

June 2024 — Present · Lagos, Nigeria · Remote

Health tech · Node.js · React · MongoDB · Prisma · Zoho CRM

- Optimized MongoDB queries using geospatial indexing and Prisma ORM, reducing average API latency from 2.5s to <800ms — a 70% improvement in response time.

- Delivered real-time medication updates using Socket.IO and React.js, enhancing user experience across pharmacy and patient platforms.

- Led Zoho CRM integration with custom backend connectors, cutting pharmacy onboarding by 40%.

- Led remote onboarding of new engineers via structured documentation and weekly pair-programming sessions, increasing team velocity by 25%.

- Diagnosed and resolved production issues using React DevTools and performance profiling on Expo apps.

DabaObject LLC, Nigeria —*Frontend Engineer* (Contract)

Jan 2024 — May 2024 · Hybrid

Restaurant Ordering SaaS · React · GitHub Actions

- Designed mobile-first restaurant UI that improved user conversion and increased average order value by 15%.

- Built modular component systems for speed and reusability using React + Tailwind.

- Automated deployments using GitHub Actions CI/CD, cutting release time by 60%.

- Conducted thorough code reviews, reducing bugs and improving maintainability.

YEBOX, Nigeria — *Backend Engineer* (August 2023 – January 2024)
Yebox.io
Aug 2023 — Jan 2024 · Nigeria · Remote

BACKEND
Node.js, NestJS, Express.js, REST

FRONTEND
React.js, TypeScript, React Native, Expo

DATABASES
MongoDB, PostgreSQL, MySQL, Prisma ORM

Core Strengths
Real-Time Systems & WebSockets

Frontend Engineering (React, TypeScript, React Native)

Backend/API Architecture (Node.js, NestJS, REST)

Agile Development & Remote Team Leadership

Scalable Database Design & Geospatial Queries

DevOps Automation & CI/CD

TOOLS
Git/GitHub/Gitlab, GitHub Actons/ Gitlab CI, Postman, Docker, Figma, Zoho CRM, Jira,

TESTS
Jest, Supertest

CLOUD SERVICES
AWS, Docker, GitHub Actions, Kubernetes, Digital Ocean, Render

Logistics SaaS · Node.js · PostgreSQL · Jest

- Refactored legacy backend codebase, improving maintainability by 40% and runtime performance by 50%.

- Introduced robust Jest-based testing coverage, enabling safer iterations and reducing production incidents.

- Restructured REST API docs and developer onboarding guides, cutting integration time for new hires by 3 days.

Howmies, Nigeria — *Full stack Engineer* (January 2020–August 2023)

Jan 2020 – Aug 2023 · Nigeria · Remote

Prop tech · Node.js · Express · React

- Built and scaled an Airbnb-style rental listing platform with advanced filtering and booking flows.

- Developed REST APIs with authentication, listing management, and email notifications via Nodemailer.

- Maintained cloud infrastructure on Digital Ocean with basic CI/CD workflows.

PROJECTS

Yebora — Backend developer

Built a secure group savings platform with Node.js, PostgreSQL, and Redis. Ensured real-time transaction updates, multi-user syncing, and zero-balance drift using custom logic.g.

Xtride — Backend Developer

Designed real-time logistics and delivery backend using NestJS and Stripe. Integrated courier tracking, driver payouts, and automated notification flows for 5k+ monthly orders.

Sportstatix — Backend Contributor

Helped build a sports performance analytics platform to optimize athlete training using game data and biometric insights

Restro — Frontend Developer

Created a mobile-friendly food ordering app with dynamic menu management for restaurant owners.

Famasi Africa — Lead Engineer

Built and scaled pharmacy and patient modules for medicine requests, delivery scheduling, and inventory. Used Expo, Zustand, TypeScript, and native integrations.
